Note to Medical Professionals: If you would like to be included on this list, please e-mail your contact information, an overview of your practice, your OM-related practice history, and other pertinent details to doctors@ocularmelanoma.org.

Patient Disclaimer: This list is not exhaustive and does not replace the guidance of a trained medical professional. By virtue of this list or by any other means, the Ocular Melanoma Foundation ("OMF") is in no way advocating a specific doctor or doctors and has no bias towards any medical practitioner over another. It is the patient's duty to thoroughly investigate all medical professionals and to make an informed decision on their own regarding their own care. OMF accepts no liability arising from the selection of a specific caregiver mentioned in this list or on any OMF website or from any treatment or other action arising from the selection of said caregiver or following of any advice or content on any OMF website.

About the Ocular Melanoma Foundation

The Ocular Melanoma Foundation (OMF) is the leading research and patient support organization focused on eye cancer. OMF was established in 2003 by Dr. Robert Allen, a renowned eye surgeon who lost his fight with ocular melanoma (OM), a rare cancer diagnosed in around 2,000 adults in the U.S. annually. Today, OMF is the #1 destination for ocular/uveal melanoma information online and a leading provider of patient education and support programs, including the annual 'Eye Am Not Alone' retreat series – now the largest OM patient & caregiver meeting globally – and the Travel Assistance Grant (TAG) program and Prosthetic Assistance Program (PAP), which provide financial assistance to patients for treatment-related travel and ocular prosthetics. In partnership with the American Association for Cancer Research (AACR), OMF has raised nearly a million dollars for OM research.
