17 **Special Report: Top Metal Builders 2013**

The Top Metal Builders for 2013 presents a picture of an industry that has stabilized and is growing. Average tonnage and square footage are up, and we see less movement among the 100 largest metal builders in the country.

36

36 **8 Common Estimating Errors for Metal Roofing**

Sometimes a metal roof is a simple square and easy to estimate, but other times it is a complicated jigsaw puzzle that requires careful piecing together. In either circumstance, a simple error—measurement, calculation or material need—can turn a great job into a profit sink.

38

38 **Caulk and Sealant Guide**

The selection of caulks and sealants has increased significantly in recent years, and choosing the right caulk or sealant for the specific job is now both more difficult and more precise. Our guide will help our readers get the right bead on the right joint.

Expand Your Business: Trucks, Booms and Lifts

40 **Lifting Steel Erectors into the Profit of Zone:**

Make your crane worthy of your company's investment

41 **Materials Handling Equipment Lifts the Bottom Line:**

Recent improvements can reduce overall lift truck expenses and boost productivity

42 **Choosing an End Effector:**

Vacuum lifters are being utilized more and more for lifting and handling insulated metal panels

Top Metal Builders 2013

By Paul Deffenbaugh, Editorial Director

The Top Metal Builders for 2013 show the metal building industry is continuing to rebound and show positive growth.

We've seen increases in both the average tonnage and average square footage built over the last few years, and this year is no exception. Not only are the top 100 metal builders increasing the number of projects they're doing, they are also increasing the size of the projects, indicating a strong, positive growth in the industry.

Our list is broken into two segments. We report the largest companies by tonnage of steel purchased on one list. And the 100 largest companies by square footage of metal building construction put in place on the second list. This year, both lists total 113 companies.

One element of compiling this list that has become increasingly challenging is determining which companies are doing what. There seems to be some consolidation up and down the supply chain that may have taken place during the recent

construction slowdown. Companies that formerly were only building erectors may also now be working as general contractors. We also see some companies moving toward a more independent status, representing more than one manufacturer. We're also seeing smaller dealers who are offering either installation services themselves or doing so with qualified or recommended contractor bases. This movement and potential consolidation of the industry will be interesting to watch in future studies.

In spite of that kind of churning, we also see greater stability in the list, with the same companies appearing year after year after year. That's not unusual in top performer lists such as Top Metal Builders. The more sophisticated companies tend to land more and larger projects. Their size alone makes them more stable, and they have devoted significant capital to metal building construction so are unlikely to veer away from it. It would be surprising, to see significant change on the list. 

Fun Facts

Average Tonnage 2012: 1,353.3 tons

Average Tonnage 2013: 1,712.2 tons

Percent Increase: 26.6 percent

Average Square Footage 2012: 364,818 square feet

Average Square Footage 2013: 473,057 square feet

Percent Increase: 29.7 percent

Company with the largest ranking increase in tonnage from 2012 to 2013: Met-Con Construction, Faribault, Minn. (70 places)

Company with the largest ranking increase in square footage from 2012 to 2013: Met-Con Construction (79 places)

Company with the largest percent increase in tonnage from 2012 to 2013: Branch Daffan, Manassas, Va. (4,380 percent)

Company with the largest actual increase in tonnage from 2012 to 2013: Span Construction & Engineering Inc., Madera, Calif. (3,271 tons)

Company with the largest percent increase in square footage from 2012 to 2013: Central Contracting Inc., St. Albans, W.Va. (1,625 percent)

Company with the largest actual increase in square footage from 2012 to 2013: SEA CON LLC, Issaquah, Wash. (3,954,150 square feet)

Oldest company founded: Dunn Building Co., Birmingham, Ala. (1878)

Newest company founded: Moltus Building Group, Midland, Mich. (2013)

SPECIAL REPORT Top Metal Builders Rank by Tonnage

Rank	Company Name/Location	Year Founded	2013 Tonnage	2012 Tonnage	% Change Tonnage	2013 Sq. Footage	Affiliated Manufacturer
