

Change your life, and the lives of others, by volunteering for Camp Barefoot May 27 - June 1, 2017

Since 1992, The Fowler Center has offered a week-long camp session for adults living with Traumatic Brain Injuries. Named for Carolyn Barefoot and her son, the family who originally approached TFC about offering such a camp, Camp Barefoot offers a week for adults with TBIs to come together with friends and have a great time at camp. The shared TBI experiences of campers along with the relaxed schedule allows campers to build a support network within camp that many access throughout the year. Camp Barefoot is scheduled over Memorial Day Week every year from Saturday through Thursday.

Volunteers assist with:

- Daily programming during the week.
- Socializing and engaging with campers.
- Helping campers traverse around camp to different activity areas.
- Assist campers in activity participation.

Volunteers receive meals and lodging during their service at camp.
